

Egis Environnement

Environmental and Sustainable Development Engineering

For over 25 years, Egis Environnement has been supporting its customers in all the environmental and sustainable development aspects of their projects, both in France and abroad.

In today's challenging and changing environment, more than ever before, the support of powerful environmental engineering can guarantee the success of your projects.

OUR ACTIVITIES

Territories & Infrastructures

Industry

Cities & Planning

OUR EXPERTISE AND SOLUTIONS

- Environmental engineering
- Biodiversity and eco-engineering
- Landscape, architecture and heritage
- Acoustics, Waves and Vibrations
- Air & odour pollution and health risks
- Géomatics
- Hydrology, hydrogeology
- Sustainable development and eco-design
- Urban requalification, reconversion, extension
- Living environment
- Industrial security and safety: risks control, modelling of hazardous event...)
- Waste management : Master planning, waste collection, treatment, recovery and recycling, rehabilitation of old landfills
- Polluted and contaminated sites & soil management : brown land redevelopment / remediation, deconstruction, asbestos removal at industrial sites /cuttings and fills management

OUR SERVICES

Engineering:

- Technical diagnostics, expert appraisals
- Feasibility studies
- Specific studies
- Design Studies
- Purchase & work procurement
- Detailed design review
- Full EPCM services and works supervision
- Integrated engineering
- Turnkey solutions

Consultancy:

- Assistance to owners
- Specialised Consultancy
- Support to consultation
- Environmental permitting
- Audit and due diligence
- Environmental risks management
- Assistance to operation
- Training and know-how transmission

OUR CLIENTS

Public and private sector clients, companies, donors

Workforce: 144 employees

Locations:

Lille / Guyancourt-Montreuil /
Aix-Marseille / Grenoble-Lyon /
Nancy-Strasbourg / Nantes /
Toulouse -Bordeaux

Certifications:

OPQIBI, ISO 9001, ISO 14001,
OHSAS 18001, COFRAC, LNE
domains A & B

EGIS ENVIRONNEMENT'S ASSETS

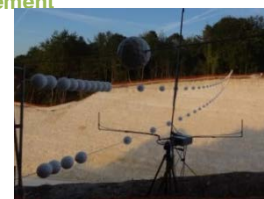

- A capacity for environmental synthesis over large areas and in complex environments.
- Multidisciplinary expertise on various environmental issues.
- Permanent regulatory monitoring to secure your projects.
- Expertise in environmental risk management and operational safety.
- High quality proven or innovative environmental solutions.
- Innovative methods for stakeholder consultation.
- Turnkey solution and financial plan

INNOVATION IS AT THE HEART OF WHAT WE DO

Egis Environnement devotes substantial resources to Research and Development to help develop innovative solutions that meet future market needs:

Some recent innovations:

- **E-participative** tools for dialogue with regions
- **BAT3 data**® 3D mapping tool for tracking bats
- **Smart Environmental System**
- **Modular unit for waste management**
- **Guiding bats during the construction phase** – 1st prize at the 2015 Biodiversity IDRRIM contest.

SOME REFERENCES

Territories & Infrastructures Roads & motorways - Railway lines and metros - Airports, ports - Energy Transportation

Nouvelle Route du Littoral, La Réunion	Eco-design, regulatory files, environmental coordination of the work site
Bouygues - Madagascar	Environmental and social studies for the concession of 2 airports (Yvato- Nosy Bé)
SNCF - GPSO	Eco-design of the project and impact assessment (400 km of railroad line)
GRT gaz – Artère du Val de Saône	Eco-design of the project, regulatory files, ecological inventories of flora, fauna, natural habitats and protected areas
RATP- Métro	Environmental and sustainable PMC for underground metro facilities (line, building, system...)

Industry Projects with technological or environmental risks - Energy facilities and those operating with natural resources

Synd. AEP de Versailles -Saint-Cloud	Analysis of the dependability of treatment plants for drinking water
Petrocuador – Equator	Risks studies of a 300 km pipeline
SIAAP	Environmental monitoring of the installations and olfactometric measures

Waste management Master planning, waste collection – Treatment, recovery and recycling - Rehabilitation of old landfills & dumpsites

SYCTOM –Paris	Health risk assessment (indoor odours) in waste treatment centres
SYDNE, Ile de la Réunion	Assistance to owner for the creation of a multi-process waste management centre
SMTD 65	Organisational review of the treatment, sorting and transfer of waste
Site Umicore, Viviez	EPCM for the treatment and disposal of industrial waste (waste storage)

Polluted and contaminated sites Brownland redevelopment, remediation, dismantling, asbestos removal, remediation of debris

GDF Suez, France	Studies and pollution control of industrial sites
Audit of industrial European sites	Environmental due diligence audit in the framework of acquisition process in Europe (France, Spain, The Netherlands, Belgium)
Industrial site - ADEME	Remediation of a former industrial site
Grand Paris Express	EPCM for remediation and debris management along the work site of line 16

Cities and Planning Urban projects and planning – Urban transports – Tourism and recreation – sustainable city -

Moulins – ZAC de Logiparc	Eco-design - Design and EPCM of environmental compensation measures
Gabon	Full Environmental and Social Impact Assessments for two hotel complexes into national parks
Angers – Cœur de Maine	Urban requalification: environmental studies of Quartier Saint Serge
Artois	Environmental studies for the set-up of a BHNS (Bus high service level) in an area classified in the Unesco world heritage.

Egis Environnement is a trademark of Egis Structures & Environnement, an Egis group Company which account 450 employees and provides consulting, engineering and project management services across 4 areas of activity organised into trademarks: Egis Jmi (civil engineering structures), Egis Tunnels, Egis Géotechnique and Egis Environnement.
